

WORLD COMMUNITY AUTISM PROGRAM

A new Light on Autism Research and Treatment

Autism, Pigments and the Immune System – an Introduction to Sara’s Diet

Sandra Desorgher, one of the foremost autism experts in the world, has clients in 48 countries. Here, she talks about the nutritional needs of the autist, and how they differ from the general population.

“World Community Autism Program, directed by Max and Sandra Desorgher, was founded in 2002, but our work towards understanding a biological basis of autism started in 1994 when Sandra’s adopted daughter, Sara, made a remarkable recovery.”

Over the last 20 years, we have witnessed the power of recovery through special diet, nutritional and healing programs. We have worked with many families directly, to transform their lives through a combined and integrated approach.

EVENING and WEEKEND SEMINARS in Abingdon

to be announced
